

# BOATFIX

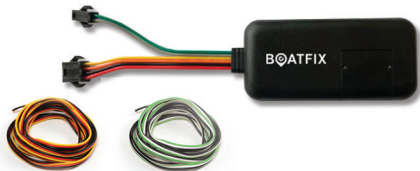

## Quickstart Guide

### You Should Have

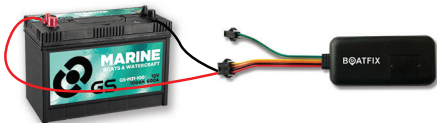

The Boat Fix Device

Red, Black, Orange, and  
Yellow Wire Tail

White and Green Wire Tail

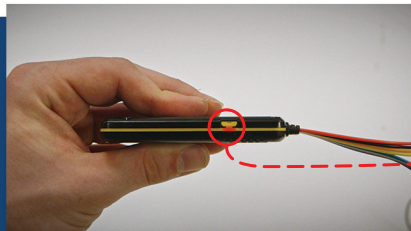

### Step 1

- Connect the red wire to the positive battery terminal.
- Connect the black wire to the negative battery terminal.

### Step 2

**Congratulations!**  
**Your Boat Fix Device is now activated!**

Look for the blinking light on the side of the device. It is located on the yellow strip by the wine glass shape.

## Step 3

- You need to locate & position the Boat Fix device in a dry, hidden location. Usually close to where you have connected the black & red wires in Step 1.
- The side with the white label **must point upwards** towards the sky so that the built in GPS antenna is facing the right way.

## Step 4

Log into your Boat Fix Pro app.

If you have not already downloaded the app, you can access it from the link on your welcome email.

### Installation Tips and Tricks

- Always ensure the wires are connected securely.
- Choose a dry, hidden location to fit and mount the device.
- Avoid installation of the device near high powered electronics & excessive amounts of metal as these can cause interference.
- For detailed instructions be sure to watch our video, or reference the booklet that came with your device
